

"Finding Aid for Uncataloged Items in the MRR"

The # in bold type [which follows the entry information] refers to the drawer or cabinet where the item is located. Please return it to the same location when finished. Thank you!!

The materials noted below are NOT cataloged and do not have a call number.

The cataloged oversize items will list the storage unit number in the "Notes" field of the associated online catalog record. Each storage unit, which includes the drawers, cabinets and file cabinets located below the bookcases on the west wall of the Missouri River Room (MRR), has been assigned a number and is labeled accordingly. If no notation is given in the online catalog record, the item has been shelved with the regular MRR collection located in the locked bookcases on the west wall and that flank the fireplace.

To see examples of the various "Notes", look at the records of the following Missouri River Room titles...

1. *Audubon's birds of America*
2. *The friendly Foley book*
3. *Standard atlas of Burleigh County, North Dakota*
